

## *Digital Technologies at Woodlupine PS*

This year, the staff have been working hard to unpack the new Technologies curriculum. This term, we have completed over four hours of Professional Learning on the ICT Capabilities, Digital Citizenship, digital devices and coding.

## *What's happening in classrooms?*

We put dots on some graph paper and then we added north, south, east and west. We worked with a buddy. We had to read the instructions to them. When we finished, we marked their work to see if they got it right. We got to show our good work at room 20. We had lots of fun!

**Tayla and Liam**

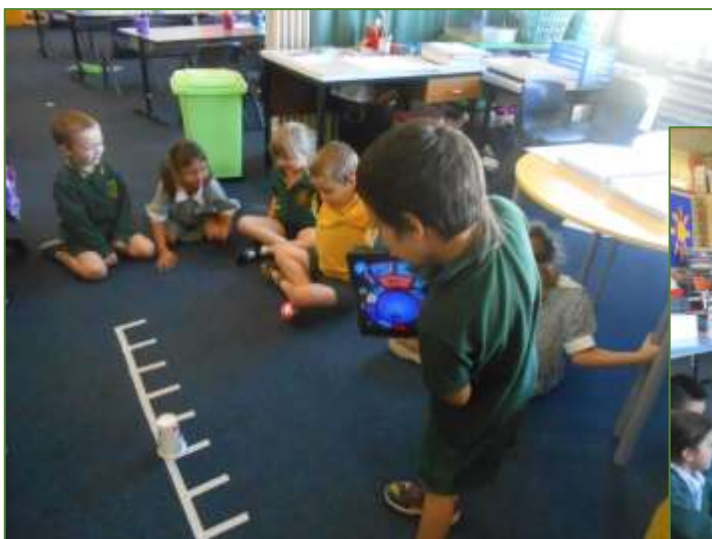

Room 5 Year 2

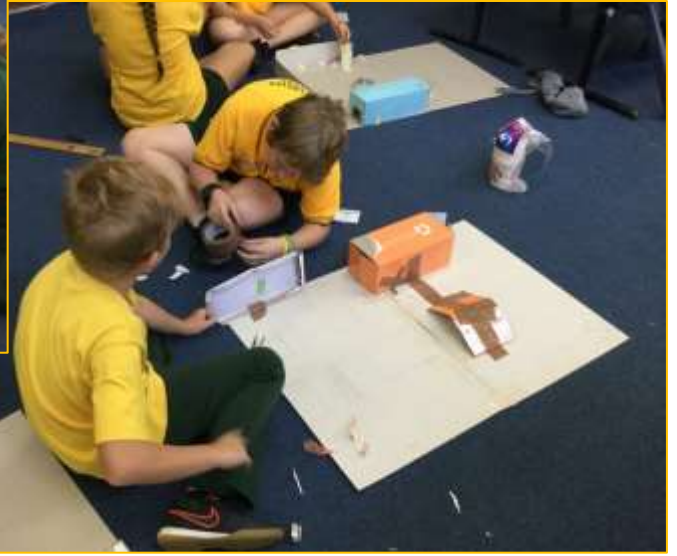

We played with the sphero robots. First, we got to choose the colour of the sphero and then we had to work out how to use it. We used our fingers on the iPad to control it. We had to move the sphero so it went around the cups. Some people knocked the cups over and someone even got the sphero inside the cup! We had lots of fun.

**Mikah and Laylah**

Room 2 Year 1

We have been making mazes for our sphero robots. The mazes need to have certain objects in them like ramps, doors to push open and something for the sphero to go under. We are using cardboard, plastic cups, shoe boxes, straws, pop sticks and sticky tape to create them. We have been working on this project now for four weeks and we are almost ready to start testing the spheros in the maze. We are enjoying this project a lot! It has been great fun!
