

Rooms 18 & 20 Assembly Item , 7/9/18

For the last five weeks the students of room 18 and 20 have worked on the musical piece for their assembly item.

Leah from Junk-adelic came to teach the students about the importance of upcycling and reusing items. She even showed them and played an electric guitar made out of a toilet seat!

The students then made their instrument, either a shaker or a drum. Then it was time to learn the song! The song had many elements- vocalists, dancers, drummers, shakers, a pianist and guitarists.

They spent a lot of time over the weeks perfecting the song. A huge focus was on beat and rhythm, an aspect which made the piece sound amazing. After a long time practising, the years 4-6 performed an amazing musical number which was enjoyed by everyone!
