Room 9, Year 3

Teamwork

This term, we have been working hard on our group work and teamwork skills. We have been focussing on improving our communication and problem solving when working cooperatively. We are also getting better at setting group goals and dealing with conflict in our groups. This

has helped us work much more effectively during our STEM project (Science, Technology, Engineering and Maths), our maths learning centres and in our spelling and reading groups. We also had lots of fun working together to build domino tracks and then watching them fall over!

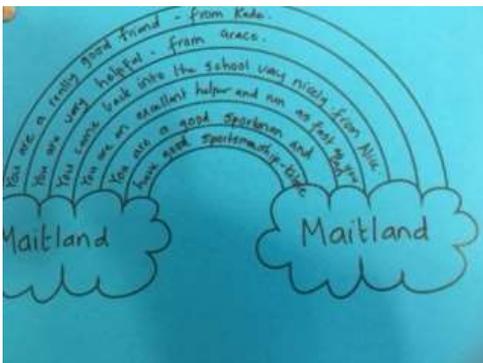

Three Stars and a Wish

We have been using the 'Three Stars and a Wish' system to help us reflect on our playground behaviour and social skills. After lunch, we think of three positive things from our playtime (stars). We then think of one thing we could improve (wish).

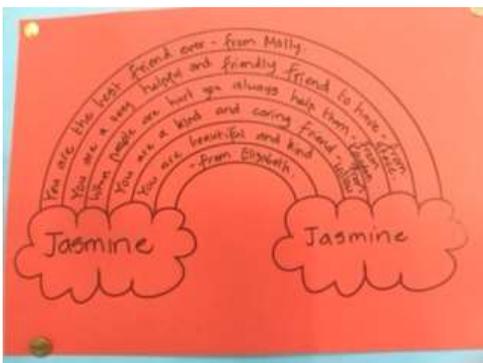

This helps guide us to think of solutions for our problems and for how to assist other students who need help.

PATHs Person

We really enjoy being the PATHs person for the day. The PATHs person is responsible for completing all the important jobs around the class and school. Some of these jobs include: be the line leader, return the library books, take messages, give out faction tokens for the teacher and hand out work and equipment.

The PATHs Person also receives lots of compliments from their classmates. It makes us feel great when we give and receive compliments. It reminds us that every person is special and has their own unique skills and personality. Giving compliments also makes our classroom a positive place to learn and grow.

Kade - You are a funny friend to have, from Alice.

Freshta - You are very nice and friendly. You work quietly and always work hard, from Grace.
